

The ExecutiveInsite Report

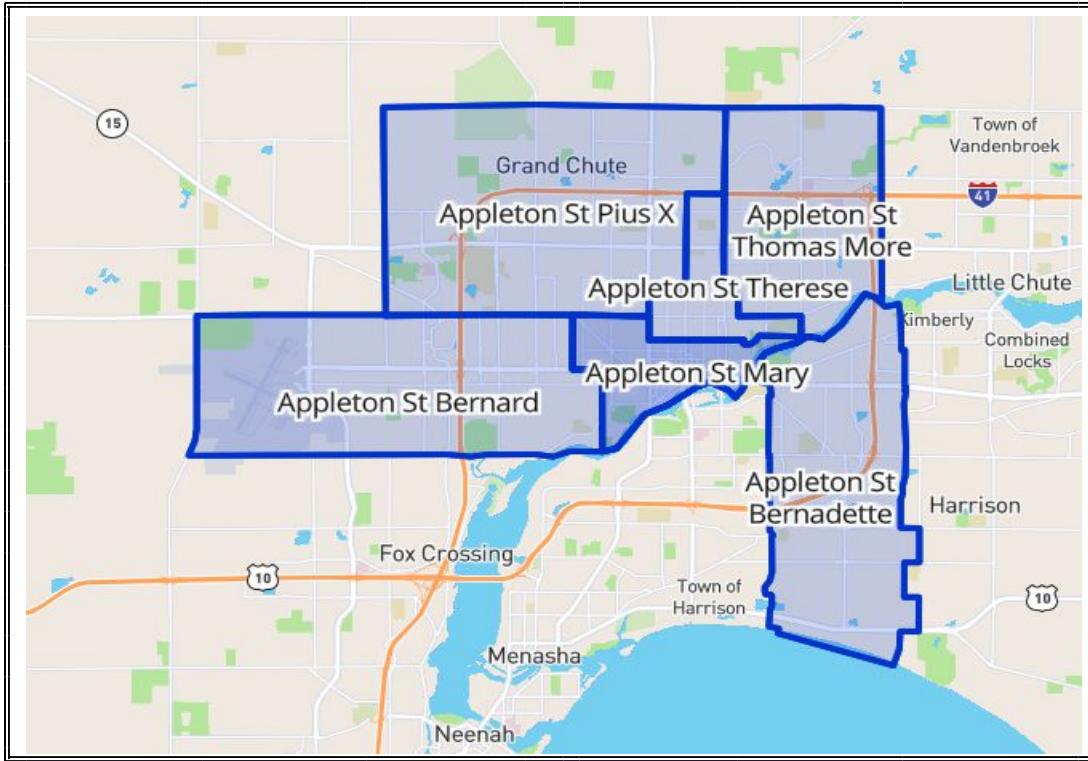

Prepared for: RC Diocese of Green Bay
 Study area: Geography: Parishes - Appleton St Mary Parishes - Appleton St Joseph Parishes - Appleton St Bernard Parishes - Appleton St Pius X Parishes - Appleton St WI

Base State:
 Current Year Estimate: 2022
 5 Year Projection: 2027
 Date: 1/5/2023
 Semi-Annual Projection: Summer

This ExecutiveInsite Report has been prepared for RC Diocese of Green Bay. Its purpose is to "tell the demographic story" of the defined geographic study area. ExecutiveInsite integrates narrative analysis with data tables and graphs. Playing on the report name, it includes 12 "Insites" into the study area's story. It includes both demographic and beliefs and practices data.

ExecutiveInsite is intended to give an overview analysis of the defined geographic study area. A defined study area can be a region, a zip code, a county or some custom defined geographic area such as a radius or a user defined polygon. The area of study is displayed in the map below.

THE STUDY AREA

THE 12 INSITES

INSITE	PAGE
Insite #1: Population, Household Trends	2
Insite #2: Racial/Ethnic Trends	3
Insite #3: Age Trends	4
Insite #4: School Aged Children Trends	6
Insite #5: Household Income Trends	7
Insite #6: Households and Children Trends	9
Insite #7: Marital Status Trends	10
Insite #8: Adult Educational Attainment	11
Insite #9: Employment and Occupations	12
Insite #10: Mosaic Household Types	13
Insite #11: Generations	14
Insite #12: Religious Program Or Ministry Preferences	15

More Information

Please refer to the last page of the report for additional notes and interpretation aides in reading the report.
 Not all of the demographic variables available in the MI System are found in this report. The FullInsite Report will give a more comprehensive view of an area's demographics.
 The American Beliefs Study provides a detailed view of religious preferences, practices and beliefs.

INSITE #1: POPULATION AND HOUSEHOLD TRENDS

Population:

The estimated 2022 population within the study area is 89,693. The 2027 projection would see the area grow by 2,430 to a total population of 92,123. The population within the study area is growing somewhat faster than the statewide growth rate. While the study area is projected to grow by 2.7% in the next five years, the state is projected to grow by 2.4%. The study area's estimated average change rate is 0.5%.

Population Per Household

Population per Household: The relationship between population and households provides a hint about how the community is changing. When population grows faster than households, it suggests an increase in the persons per household. This can only happen when more persons are added either by birth or other process such as young adults in multiple roommate households or young adults returning to live with parents. In some communities this can occur when multiple families live in the same dwelling unit.

Households:

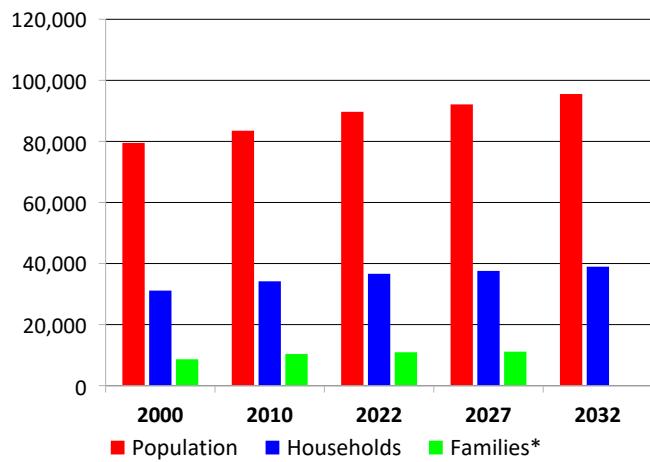

The households within the community are growing but not as fast as the population, thus the average population per household in 2010 was 2.44 but by 2027 it is projected to be 2.45. Compare this to the statewide average which for the current year is estimated at 2.49 persons per household.

Family Households:

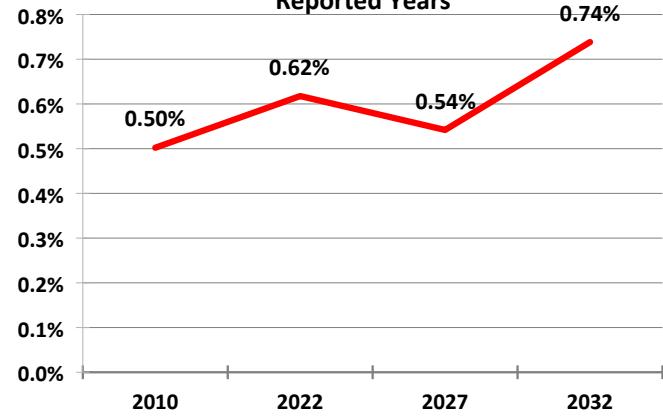

Family households provide an additional hint about the changing dynamics of a community. If family household growth follows population growth, then it would be reasonable to assume that the increasing population per household comes from additional children. However, within the study area, this is not the case. Family households are not growing as fast as the population, suggesting the growth may be the result of growth of non-family adult households.

Population/Households & Family Trends	2000	2010	2022	2027	2032
Population	79,512	83,504	89,693	92,123	95,524
Population Change		3,992	6,189	2,430	3,401
Percent Change		5.0%	7.4%	2.7%	3.7%
Households	31,130	34,176	36,634	37,581	38,959
Households Change		3,046	2,458	947	1,378
Percent Change		9.8%	7.2%	2.6%	3.7%
Population / Households	2.55	2.44	2.45	2.45	2.45
Population / Households Change		-0.11	0.01	0.00	0.00
Percent Change		-4.3%	0.2%	0.1%	0.0%
Families	8,636	10,365	10,940	11,136	
Families Change		1,729	575	196	
Percent Change		20.0%	5.5%	1.8%	

Population, Household & Family Trends

Average Annual Percentage Change Between Reported Years

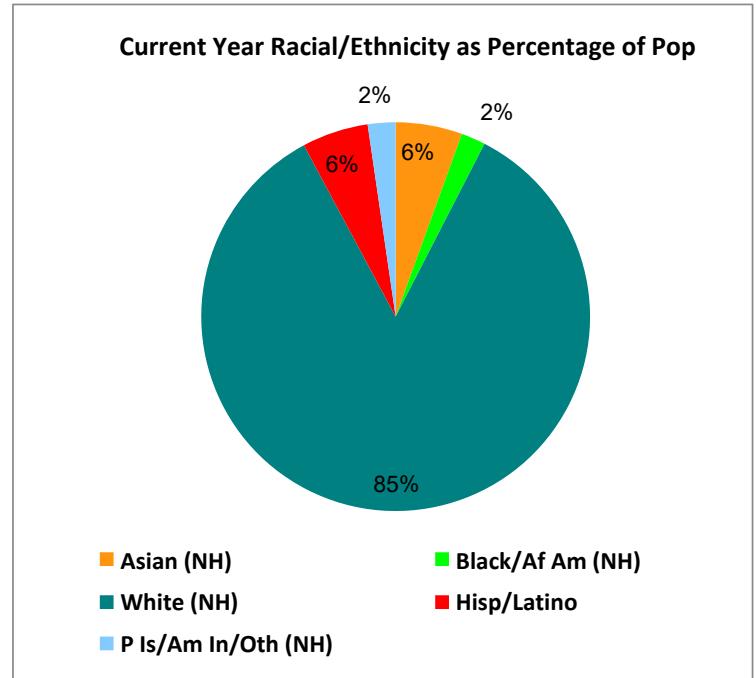

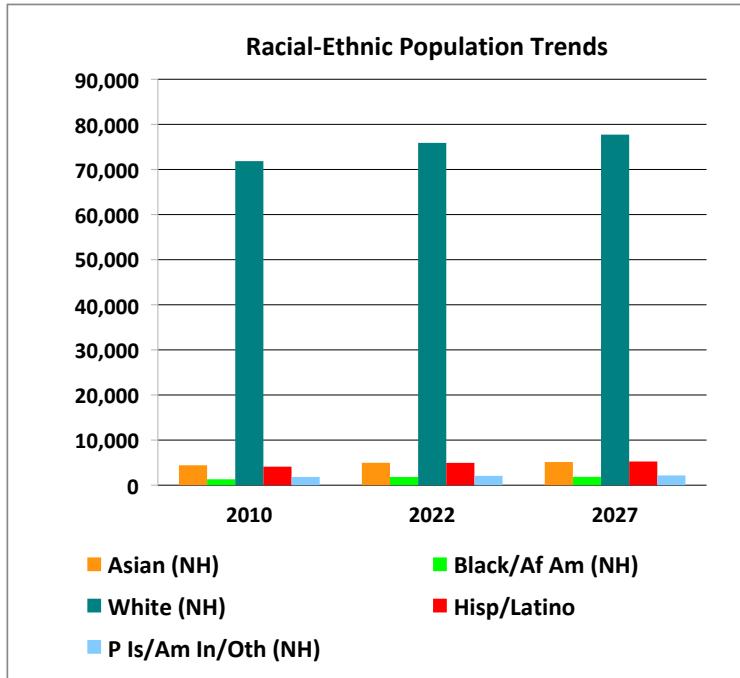

NOTE: Family Household data is not projected out 10 years.

INSITE #2: RACIAL-ETHNIC TRENDS

The US population's racial-ethnic diversity is continually adding new and rich cultural mixes. This data considers the five groups for which trending information is available. Please note that several groups are aggregated into a single category due to their smaller size. Those persons who indicated Hispanic or Latino ethnicity along with a racial category have been separated into a Hispanic or Latino category.

The Population: Racial/Ethnic Trends table provides the actual numbers and percentage of the total population for each of the five racial/ethnic categories. Pay special attention to the final column on the right. This will quickly indicate the direction of change from the last census to the current five year projection.

The Racial Ethnic Trends graph displays history and projected change by each racial/ethnic group.

This chart shows the percentage of each group for the current year estimate.

The percentage of the population...

Asian (Non-Hisp) is projected to remain about the same over the next five years.

Black/African American (Non-Hisp) is projected to remain about the same over the next five years.

White (Non-Hisp) is projected to remain about the same over the next five years.

Hispanic or Latino is projected to remain about the same over the next five years.

Race and Ethnicity	2010	2022	2027	2010%	2022 %	2027 %	2010 to 2027 %pt Change
Asian (NH)	4,413	4,966	5,136	5.28%	5.54%	5.58%	0.29%
Black/Afr Amer (NH)	1,307	1,814	1,848	1.57%	2.02%	2.01%	0.44%
White (NH)	71,849	75,897	77,724	86.04%	84.62%	84.37%	-1.67%
Hispanic/Latino	4,106	4,949	5,251	4.92%	5.52%	5.70%	0.78%
P Is/Am In/Oth (NH)	1,829	2,069	2,164	2.19%	2.31%	2.35%	0.16%
Totals:	83,504	89,695	92,123				

INSITE #3: AGE TRENDS

A community's age structure and how it is changing is an important part of its story. Overall, the American Population has been aging as the Baby Boomers progress through each phase of life. This has been abetted by episodes of declining live births. However, this picture may particularize differently from community to community. There are communities in the US where the average age is lower than some others. In other cases, there is a clear shift toward senior years as the Boomers enter their retirement years.

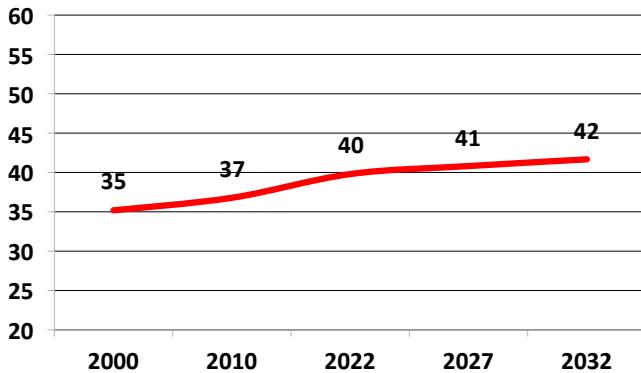

The Age Trend Insite explores two variables: Average age and Phase of Life.

Average Age Trends provides five important snapshots of a community from five data points; the 2000 census, the last census, the current year estimate, the five-year projection and the ten year forecast. These five numbers will indicate the aging direction of a community.

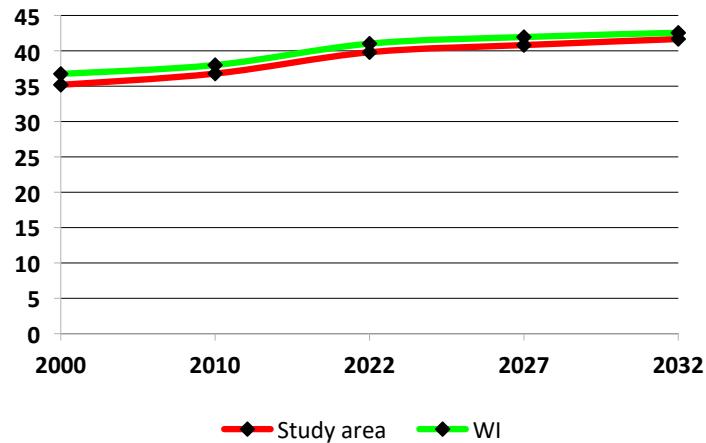

The Phase of Life Trends breaks the population into seven life phases that the population passes through in its life time.

AGE					
Average Age Trends	2000	2010	2022	2027	2032
Average Age: Study Area	35.19	36.78	39.80	40.81	41.67
Percent Change		4.5%	8.2%	2.6%	2.1%
Average Age: WI	36.74	37.99	41.02	41.95	42.56
Percent Change		3.4%	8.0%	2.3%	1.4%
Comparative Index	96	97	97	97	98
Median Age: Study Area	33	35	38	40	40

Study Area Average Age Trend

Ave. Age Comparison: Study Area to State

Summary of Average Age Findings:

The Average Age Trend chart shows both history and projection of the change in average age in the study area. The average age of the study area has been rising for several years. It is projected to rise over the next five years.

A comparison to the average age of the state helps to contextualize the significance of the average age of the study area and its history and projection. In the graph above, the study area and state are laid out side by side. The state's average age is estimated to be about the same as the study area.

INSITE #3: AGE TRENDS (continued)

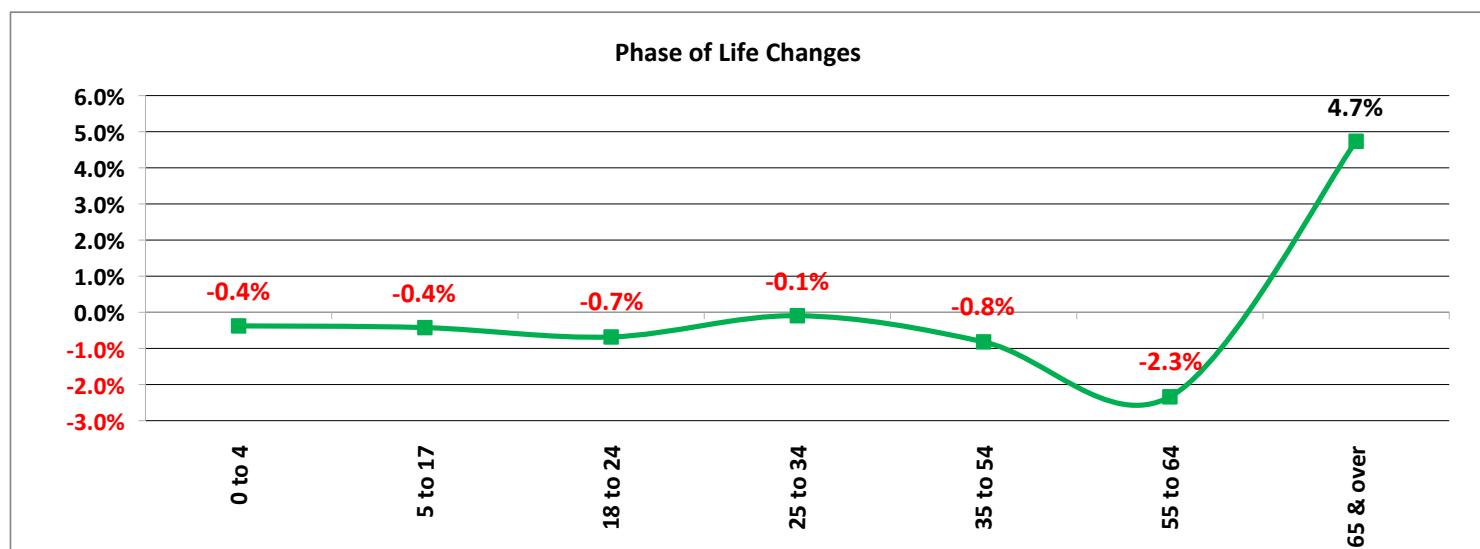

PHASE OF LIFE

The Phase of Life analysis provides insight into the age distribution of a population across the different stages of life experience. It can reveal a community in transition.

Pay special attention to the color codes of the Change column (far right below). It will immediately indicate which phases are increasing or decreasing as a percentage of the population.

Phase of Life	2010	2022	2027	2032	2010%	2022%	2027%	2032%	Estimated 10 Year %pt Change 2022 - 2032
Before Formal Schooling									
Ages 0 to 4	5,487	5,404	5,359	5,415	6.6%	6.0%	5.8%	5.6%	-0.4%
Required Formal Schooling									
Ages 5 to 17	14,365	14,112	14,022	14,677	17.2%	15.7%	15.2%	15.3%	-0.4%
College/Career Starts									
Ages 18 to 24	8,488	8,897	8,970	8,855	10.2%	9.9%	9.7%	9.2%	-0.7%
Singles & Young Families									
Ages 25 to 34	12,382	11,267	11,593	11,952	14.8%	12.6%	12.6%	12.5%	-0.1%
Families & Empty Nesters									
Ages 35 to 54	23,373	22,853	22,851	23,641	28.0%	25.5%	24.8%	24.7%	-0.8%
Enrichment Years Sing/Couples									
Ages 55 to 64	9,449	12,193	11,386	10,789	11.3%	13.6%	12.4%	11.3%	-2.3%
Retirement Opportunities									
Age 65 and over	9,960	14,967	17,942	20,536	11.9%	16.7%	19.5%	21.4%	4.7%

Phase of Life Changes

Summary of Phase of Life Findings:

Phase of Life changes reflect the age profile of a community. On average, it takes 2.1 children per woman to replace both mother and father. If the percentage of the population under 20 is declining as a percentage of the total it is likely that the community will see an increase in the more senior aged population possibly due to a decline in birth rates.

In this study area children 17 years of age and younger are declining as a percentage of the total population. Considering the other end of the phases of life, adults 55 years of age and older are increasing as a percentage of the total population.

In summary it may be that the community is aging as children are raised and leave but parents remain.

INSITE #4: SCHOOL AGED CHILDREN TRENDS

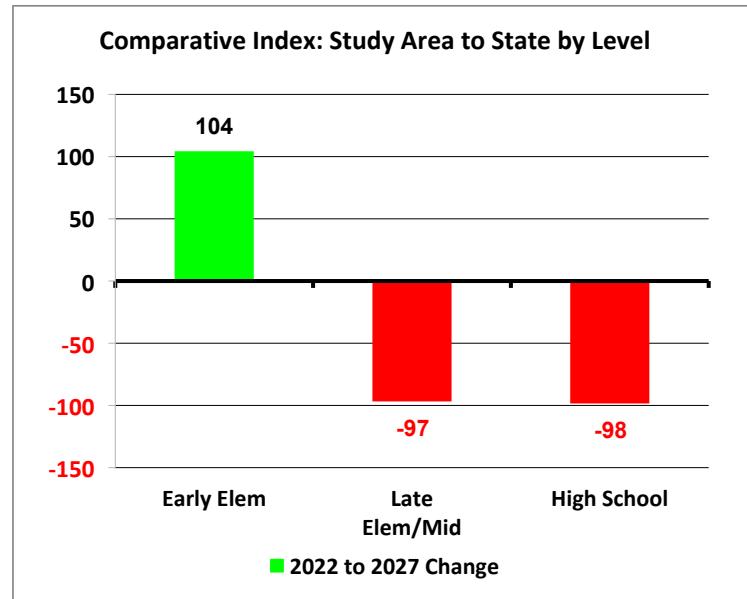

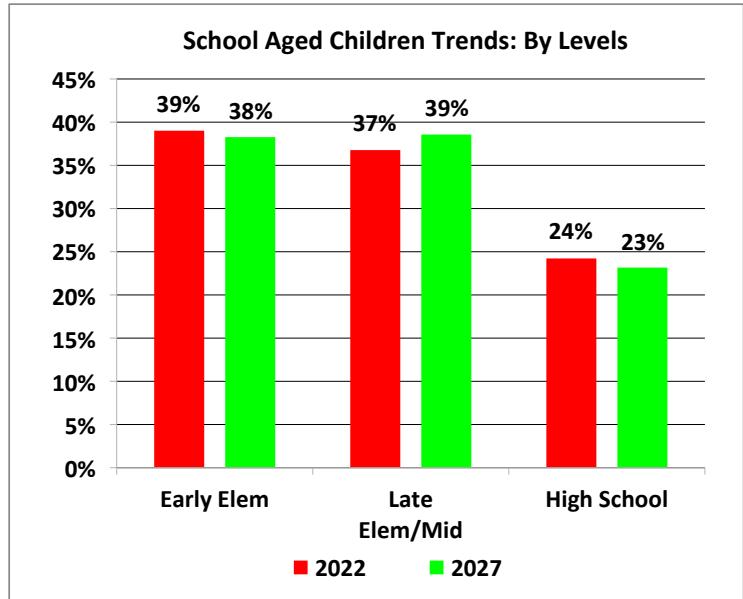

Children are the future! Understanding their specific population dynamics is critical for all planners of social and/or educational services. The “School Aged Children” variable is a subset of the “Required Formal Schooling” segment in the Phase of Life profile. It allows one to zoom in more closely on the children who are of formal schooling age.

The school aged population includes all school aged children including those enrolled in public and private schools, those home schooled and children in institutions.

The School Aged Children variable provides a snapshot of three levels of the population that comprise school age children. The three levels roughly correspond to the following.

- Elementary grades
- Intermediate/Middle School grades
- High School grades

School Aged Children	2010	2022	2027	2010%	2022%	2027%	Estimated 5 Year %pt Change 2022 - 2027
Early Elementary Ages 5 to 9	5,542	5,505	5,366	38.6%	39.0%	38.3%	-0.7%
Late Elementary-Middle School Ages 10 to 14	5,348	5,188	5,408	37.2%	36.8%	38.6%	1.8%
High School Ages 15 to 17	3,475	3,418	3,248	24.2%	24.2%	23.2%	-1.1%

Summary of School Aged Children Findings:

Early Elementary children ages 5 to 9 are projected to decline as a percentage of children between 5 and 17 by -0.7%.

Late Elementary to Middle School aged children ages 10 to 14 are increasing as a percentage of children between 5 and 17 by 1.8%.

High School aged children 15 to 17 are declining as a percentage of children between 5 and 17 by -1.1%.

Overall, children are aging through, but not being replaced at the younger levels.

INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS

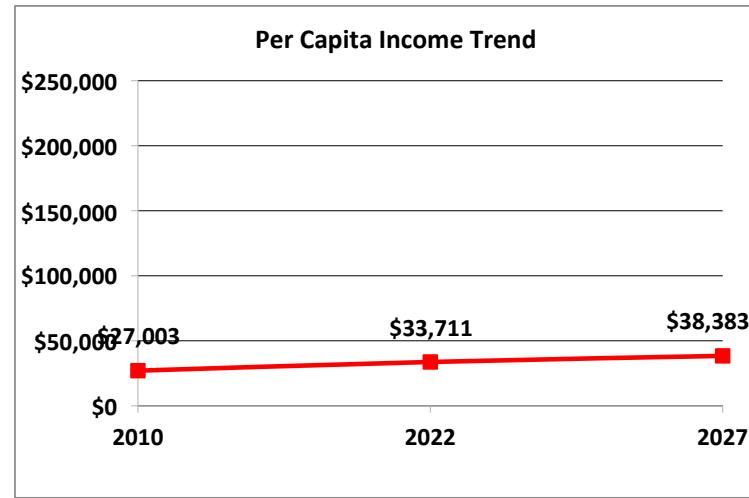

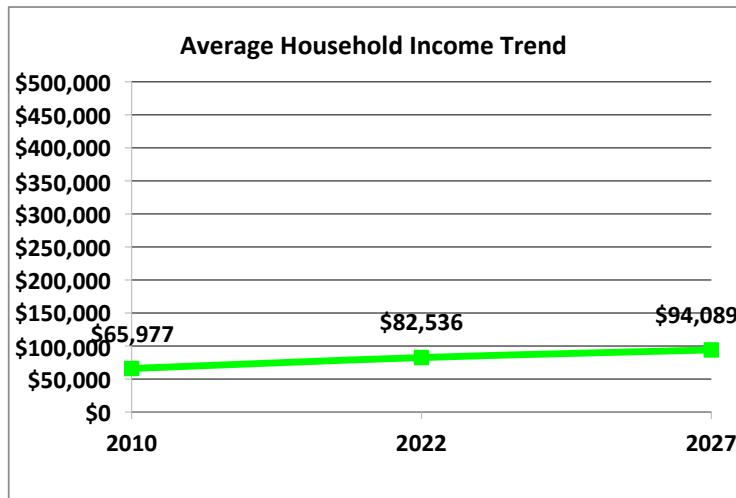

AVERAGE HOUSEHOLD INCOME AND PER CAPITA INCOME

Average Household Income and Per Capita Income indicate the level of financial resources within a community. Average Household income reflects the average income for each household, whether family or non-family.

In this study area, the estimated current year average household income is \$82,536. The average household income is projected to grow by 14.0% to \$94,089.

Per Capita Income is a measure of the average income of all persons within a household. For family households, this would include all children. It does not mean that each person actually contributes to the average income from work. It is calculated by dividing the aggregate household income by the population.

The estimated per capita income for the current year is \$33,711. The Per Capita Income is projected to grow by 13.9% to \$38,383.

Income Trends	2010	2022	2027	2010%	2022%	2027%	Estimated 5 Year %pt Change 2022 - 2027
Households							
Less than \$10,000	1,980	1,295	1,272	5.8%	3.5%	3.4%	-0.2%
\$10,000 to \$14,999	1,816	1,123	987	5.3%	3.1%	2.6%	-0.4%
\$15,000 to \$24,999	3,554	3,247	2,883	10.4%	8.9%	7.7%	-1.2%
\$25,000 to \$34,999	3,658	3,690	3,158	10.7%	10.1%	8.4%	-1.7%
\$35,000 to \$49,999	5,391	4,696	4,256	15.8%	12.8%	11.3%	-1.5%
\$50,000 to \$74,999	7,184	7,615	7,029	21.0%	20.8%	18.7%	-2.1%
\$75,000 to \$99,999	4,487	5,353	5,456	13.1%	14.6%	14.5%	-0.1%
\$100,000 to \$149,999	3,998	5,562	6,640	11.7%	15.2%	17.7%	2.5%
\$150,000 to \$199,999	1,184	2,512	3,188	3.5%	6.9%	8.5%	1.6%
\$200,000 or more	924	1,540	2,712	2.7%	4.2%	7.2%	3.0%
Totals	34,176	36,633	37,581				

INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS (continued)

FAMILY INCOME

Family income is a sub-set of household income. It excludes non-family households. Family households include two or more persons who are related and living in the same dwelling unit. Children are more likely to live in family households. Non-family households are households in which two or more persons live in the same dwelling unit but are unrelated.

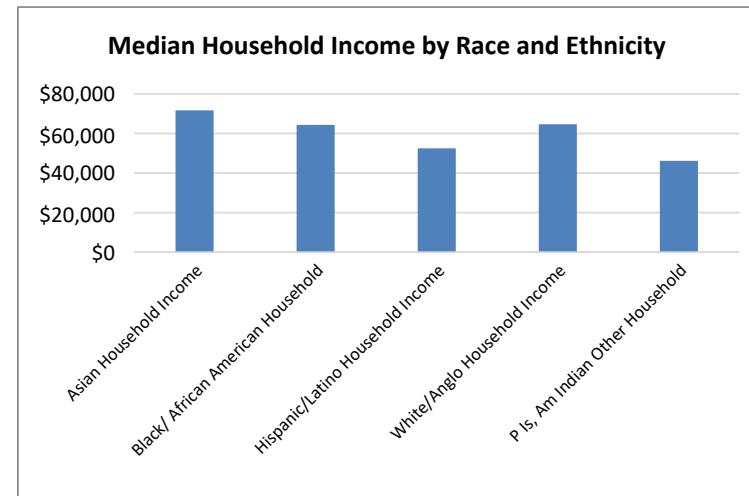

The number of families with annual incomes above \$100,000 is projected to grow over the next five years. For the current year, it is estimated that 35.4% of all family incomes exceed \$100,000 per year. In five years that number is projected to be 35.6%.

Income Trends	2022	2027	2022%	2027%	Estimated 5 Year %pt Change 2022 - 2027
Families					
Less than \$10,000	485	462	2.1%	1.9%	-0.16%
\$10,000 to \$14,999	538	514	2.3%	2.2%	-0.17%
\$15,000 to \$24,999	1,298	1,282	5.6%	5.4%	-0.24%
\$25,000 to \$34,999	1,592	1,897	6.9%	8.0%	1.07%
\$35,000 to \$49,999	2,380	2,394	10.3%	10.0%	-0.26%
\$50,000 to \$74,999	4,643	4,739	20.1%	19.9%	-0.22%
\$75,000 to \$99,999	3,978	4,053	17.2%	17.0%	-0.22%
\$100,000 to \$149,999	4,471	4,588	19.4%	19.3%	-0.11%
\$150,000-\$199,999	2,300	2,424	10.0%	10.2%	0.21%
\$200,000 or more	1,401	1,471	6.1%	6.2%	0.11%
Totals	23,086	23,824			

MEDIAN INCOME BY RACE AND ETHNICITY

Median income by race and ethnicity is a subset of household income. Median income is that point where there are as many households with incomes greater than the median as there are households with incomes less than the median.

Median Income by Race and Ethnicity	2022
Asian Household Income	\$71,694
Black/ African American Household Income	\$64,341
Hispanic/Latino Household Income	\$52,474
White/Anglo Household Income	\$64,676
P Is, Am Indian Other Household Income	\$46,173
Average	\$59,872

INSITE #6: HOUSEHOLDS AND CHILDREN TRENDS

Diversity of child rearing environments is increasing along with the many other types of growing diversity in the US. To understand this, we begin with the types of households that exist in a community. There are...

- family households with children under 18
- family households without children under 18

The concern of this analysis is family households with children under 18. Of the types of family households with children there are...

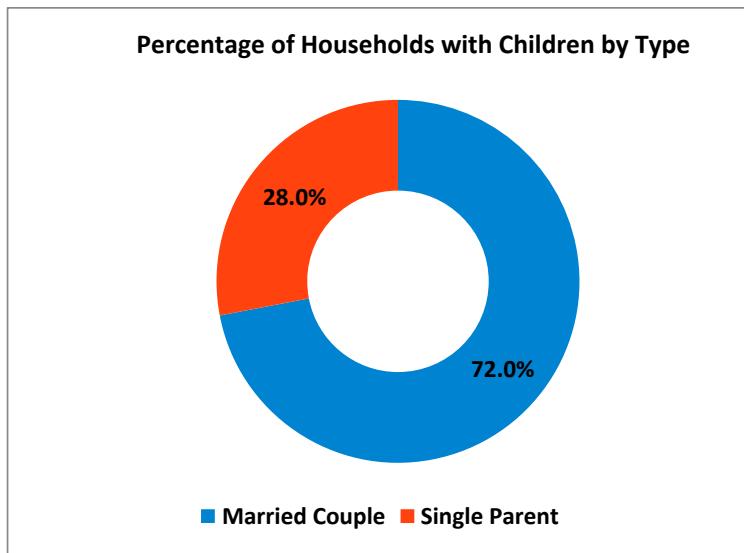

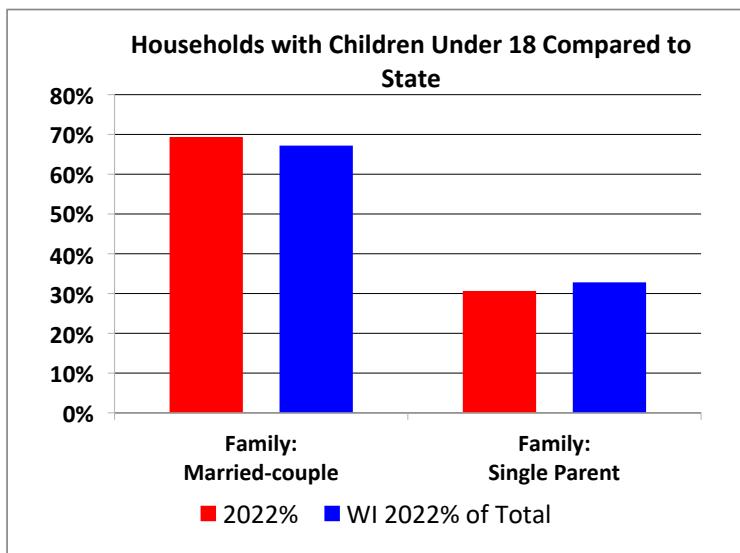

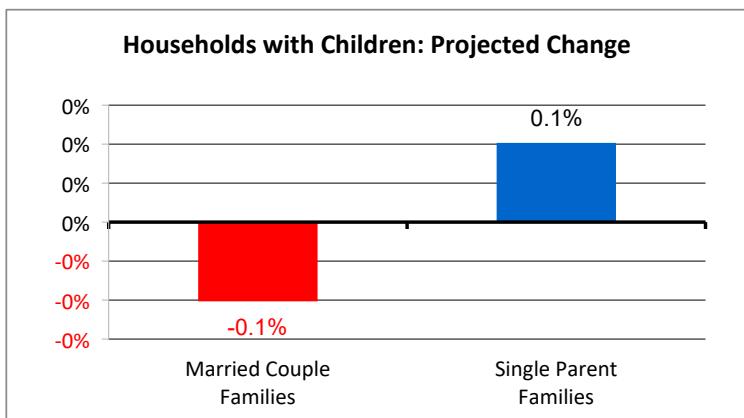

- Married couple families
- Single parent families (father or mother)

These two are reported for the study area in the table below.

Households	2010	2022	2027	2010%	2022%	2027%	Estimated 5 Year %pt Change 2022 - 2027
Households with Children under 18							
Married Couple	7,219	7,670	7,790	69.4%	72.0%	71.9%	-0.1%
Single Parent	3,190	2,985	3,047	30.6%	28.0%	28.1%	0.1%

Of the households with children under 18, married couple households are decreasing as a percentage while single parent households are increasing. The graph to the right illustrates this. Bars above the 0% point indicate a family type that is increasing while bars below 0% is decreasing. This provides "insite" into how family households and structures with children are changing in the study area.

A comparison to the state reveals to what extent this community is similar or dissimilar to the state as a whole. The study area's married couple households with children are similar to the state's profile. The percentage of single parent households with children is less than the state.

INSITE #7: MARITAL STATUS TRENDS

MARITAL STATUS BY TYPE

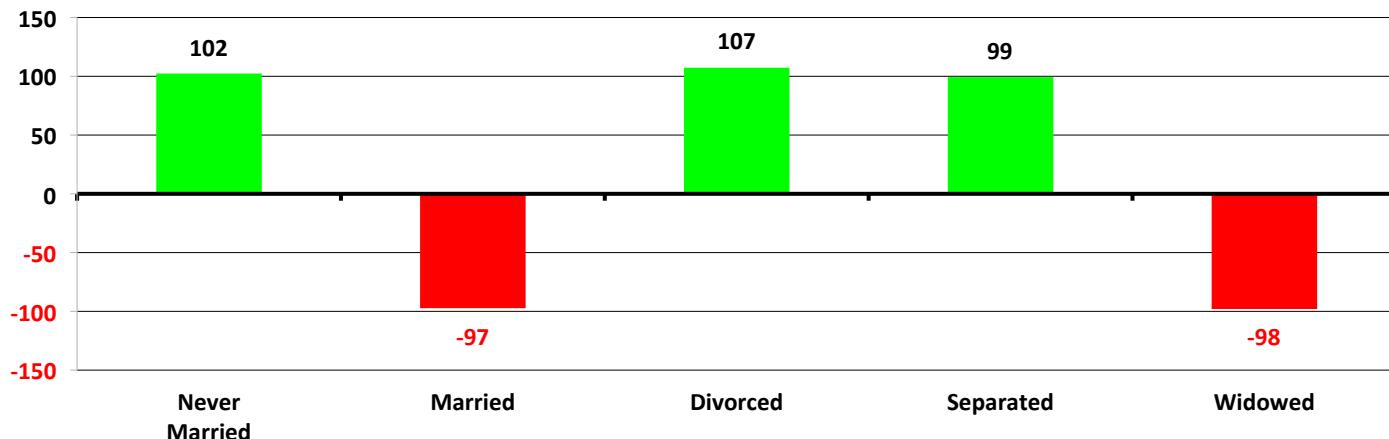

Population by Marital Status considers the number and percentage of persons 15 years of age and greater by their current marital status. Trend information as well as a comparison to the study area's state marital status types provide two different views of this social reality.

- Marital types reported include..
- Never Married (Singles)
 - Currently Married
 - Divorced
 - Separated
 - Widowed

	2010	2022	2027	2010%	2022%	2027%	2010 to 2027 %pt Change
Population by Marital Status: Age 15+							
Never Married	20,102	23,604	24,424	29.5%	32.1%	32.1%	2.7%
Married	37,662	36,796	37,882	55.2%	50.0%	49.9%	-5.4%
Divorced	6,391	8,404	8,724	9.4%	11.4%	11.5%	2.1%
Separated	740	745	718	1.1%	1.0%	0.9%	-0.1%
Widowed	3,301	4,046	4,242	4.8%	5.5%	5.6%	0.7%

In this community, the current year estimate of marital status reveals a community of adults less likely to be married than the state average for adults. The percentage single, never married in the study area is higher than the state average for adults 15 years and older. Divorce is more prevalent than the state wide average.

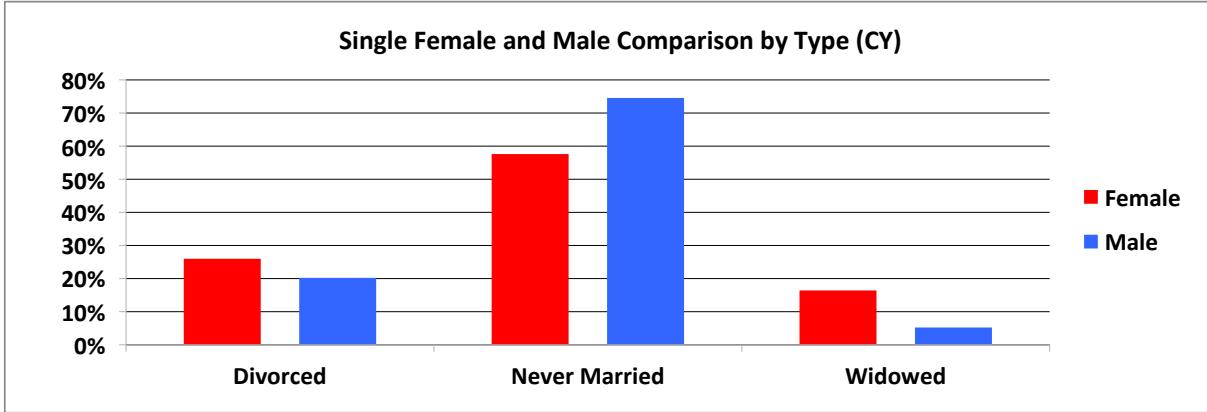

Marital Status: Comparison to the State

Women 15 years and older are more likely to be divorced than men.

Women 15 years and older are more likely to be widowed than men.

Single Female and Male Comparison by Type (CY)

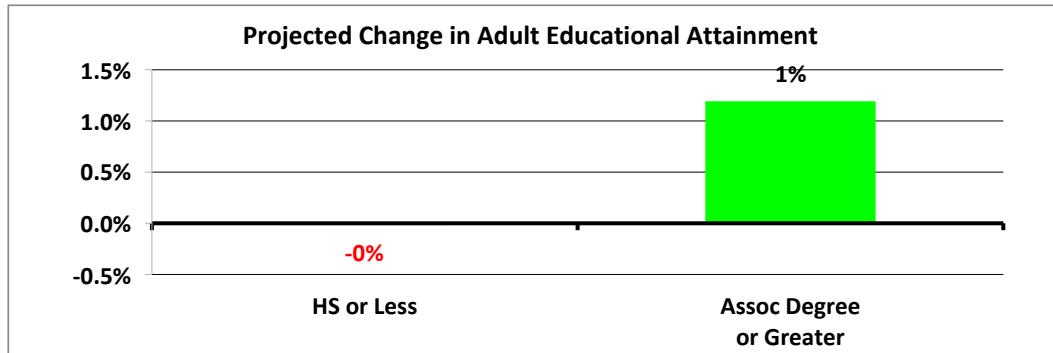

INSITE #8: ADULT EDUCATIONAL ATTAINMENT

The level of educational attainment of a community's adult population is an important indicator of its opportunities and challenges. This analysis will look at the Adult Educational Attainment from three perspectives.

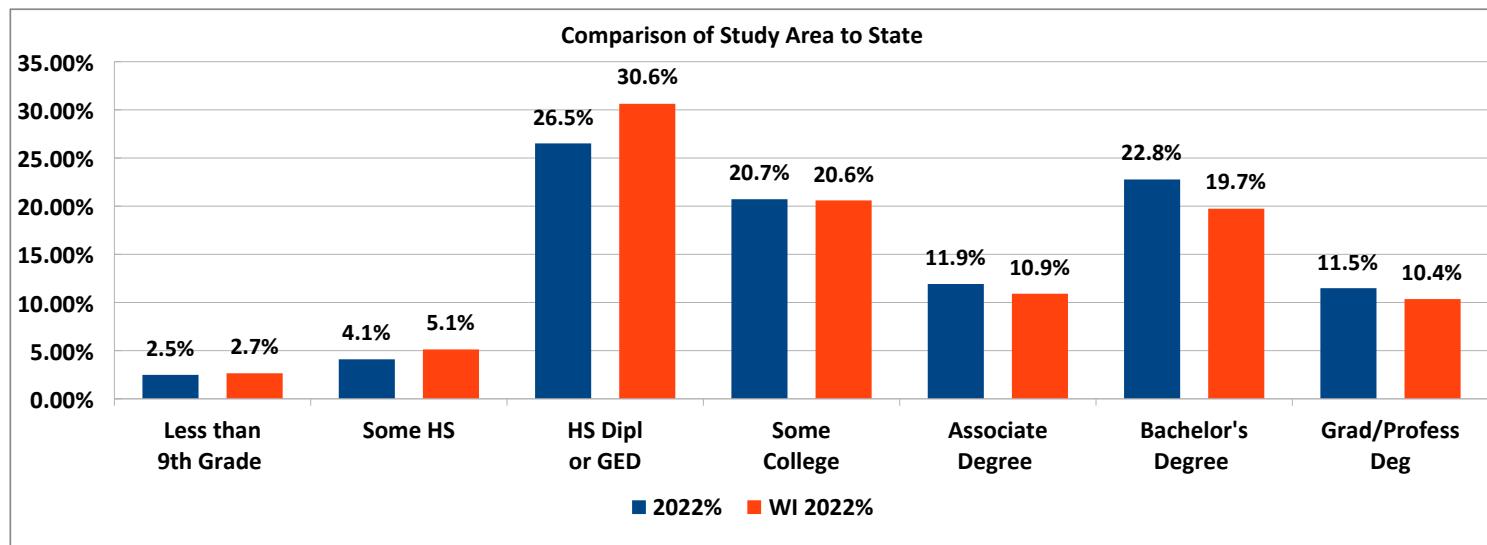

First, it looks to see if the level of educational attainment for adults is rising or not. Second, it compares the level of attainment to that of the state of WI. (If this is a state report, the comparison will be to itself.) Finally, the table provides the percentages from 2010.

EDUCATIONAL LEVEL ATTAINMENT CHANGE

The educational attainment level of adults has been rising over the past few years. It is projected to rise over the next five years by 1.2%.

EDUCATIONAL LEVEL COMPARED TO THE STATE

	2010	2022	2027	WI 2022%	2022 Study Area-State Comp Index	
Population by Educational Attainment: 25+						
Less than 9th Grade	2.9%	2.5%	2.5%	2.7%	94	The overall educational attainment of the adults in this community is greater than the state.
Some HS	4.6%	4.1%	4.1%	5.1%	80	
HS Dipl or GED	29.8%	26.5%	25.7%	30.6%	87	
Some College	20.0%	20.7%	20.3%	20.6%	101	
Associate Degree	10.3%	11.9%	12.0%	10.9%	109	
Bachelor's Degree	22.9%	22.8%	23.5%	19.7%	115	
Grad/Profess Deg	9.4%	11.5%	11.9%	10.4%	111	

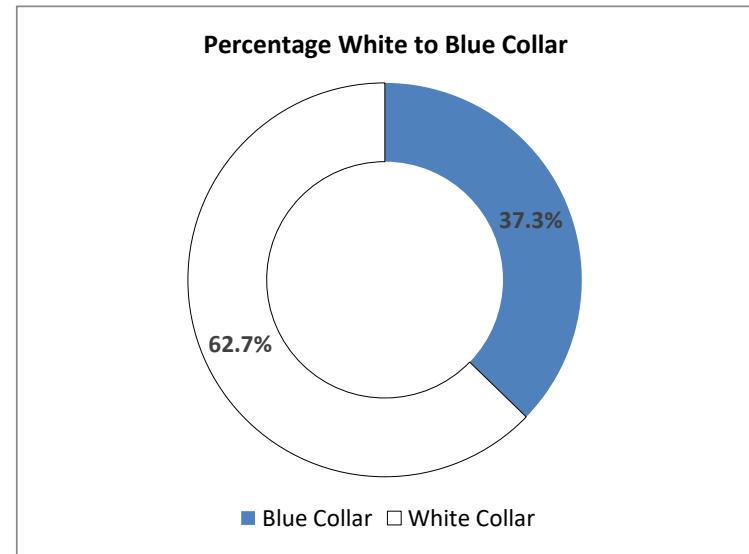

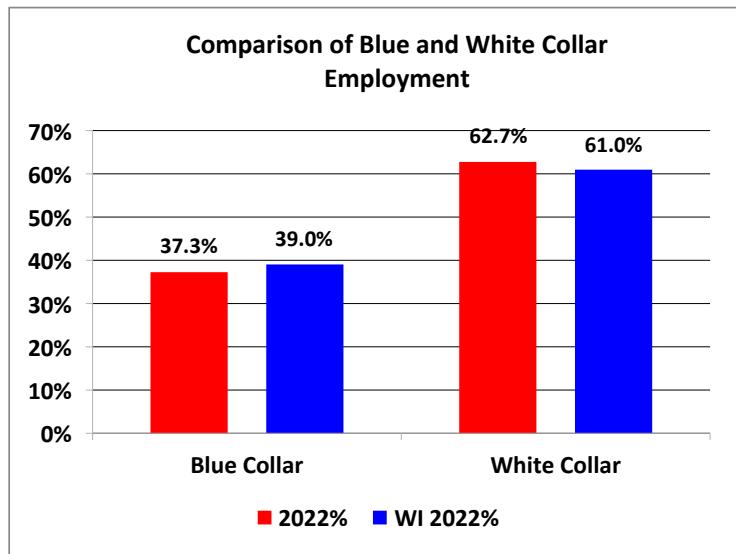

INSITE #9: POPULATION BY EMPLOYMENT

Like educational attainment, an analysis of a community by its employment types and categories provides an important "insite" into its socio-economics. This analysis looks at two factors.

First is a report of the employed population 16 and over by the traditional "blue collar" and "white collar" occupations and compares these to the state. Second, it looks at the community by the seven standard census bureau occupations and compares them to the state.

EMPLOYED POPULATION: BLUE COLLAR OR WHITE COLLAR

On the chart to the left, the study area is compared to the state of WI. This study area is close to the state average for White Collar workers. It is close to the state average for Blue Collar workers.

EMPLOYED CIVILIAN POPULATION BY OCCUPATION

Employed Civilian Pop 16+ by Occupation	2022	WI 2022	Comp. Index	Interpretation
Bldg Maintenance & Cleaning	2.5%	3.3%	76	Well below the state average.
Construction	6.2%	7.7%	81	Well below the state average.
Farming, Fishing, & Forestry	0.2%	0.9%	26	Well below the state average.
Food Preparation Serving	5.9%	5.4%	108	At about the state average.
Healthcare Support	3.2%	3.7%	88	Well below the state average.
Managerial Executive	15.1%	14.9%	101	At about the state average.
Office Admin	11.8%	11.5%	103	At about the state average.
Personal Care	2.6%	2.4%	108	At about the state average.
Production Transportation	18.2%	17.7%	103	At about the state average.
Prof Specialty	22.5%	21.7%	104	At about the state average.
Protective	1.6%	1.6%	101	At about the state average.
Sales	10.0%	9.2%	109	At about the state average.

INSITE #10: MOSAIC Segments

Mosaic is a geo-demographic segmentation system developed by and for marketers. Instead of looking at individual demographic variables, a segmentation system clusters households into groups with multiple common characteristics. Demographic variables that generally cluster together would include income, educational levels, presence of children and occupations among others.

This database is developed by Experian. Some find the information helpful because it presents a multi-dimensional view of a community.

In the report below, the top 15 Mosaic Segments of the study area are provided. (If less than 15, rows will be blank.)

NOTE: For a full description please see the DI Demographic Segment Guide (Mosaic) under the Help menu on the Documents gallery.

Mosaic Segments	2022	2022%	State %	Comp Index	Relative to the WI State Ave.
E20 Thriving Boomers - No Place Like Home	3,243	9.0%	4.5%	201	Well above the state average
L42 Blue Sky Boomers - Rooted Flower Power	2,814	7.8%	3.5%	226	Well above the state average
J34 Autumn Years - Suburban Sophisticates	2,804	7.8%	5.3%	148	Well above the state average

INSITE #11: GENERATIONS

A powerful way to envision demographics is by following a generation through its phases of life. This is because there are, in a general sense, common life experiences at each phase of life. But even more interesting is to understand a generational cohort group that has a unique sense of belonging to others born and coming of age together. More than mere age bracketing, a generation develops a sense of identity as a group based upon their coming of age experiences—how they were parented and major world defining events, such as 9/11. Using the Strauss and Howe model of generations one is able to see a more three-dimensional view of a generational group, bringing mere age demographics to life.

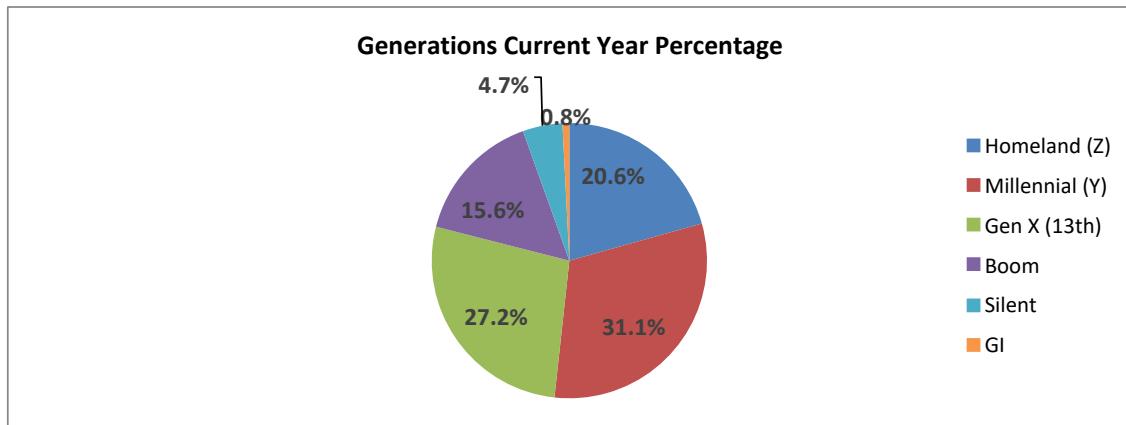

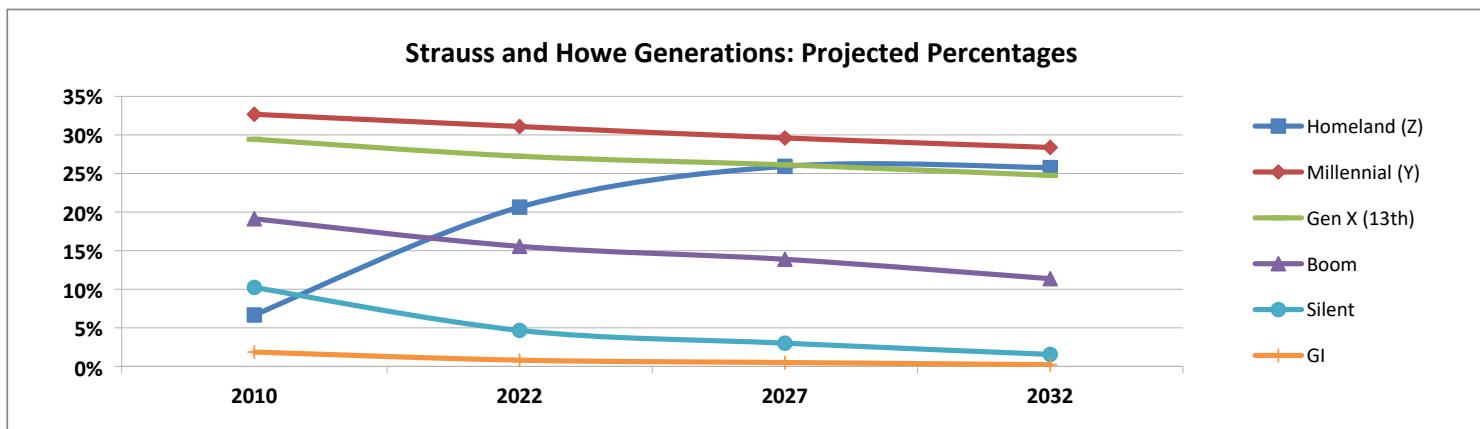

According to the Strauss and Howe model, members of a generation share three qualities.*

- An age location in history
- Some common beliefs and behaviors, including basic attitudes about risk taking, culture and values, civic engagement, and family life
- A common perceived membership in a generation, e.g., Boomers, Gen X, Millennials etc.

Warm and friendly encounters	44.1%	37.8%	44.1%	35.8%	100	106

Supporting Information

Interpreting the Report

The ExecutiveInsite report is designed for easy reading. But there are several tools provided in the tables that make this easier.

Change over time: Several trend tables have a column indicating a change over time. Generally these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

Color Coding: Both the "Change over Time" and "Comparative Indexes" columns are color coded to easily spot any change and the direction of that change.

Change:	Increasing	Stable	Declining
Index:	Above Ave	Ave	Below Ave.

Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your

[Click to download the ExecutiveInsite Worksheet. To open it in a new tab, press Ctrl when you click.](#)

Indexes: Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.
